

# eCLINiC

## CLINiC-PSX30-5X22

The Iron Bow family of Clinical Care Devices (CLINiC™) are purpose-built for telehealth consultations, providing crisp, clear audio and video. The eCLINiC is the latest addition to the product family, an economic, compact unit allowing for the extension of high quality telehealth services to all parts of the healthcare continuum. Multiple video applications are supported, including Standards Based SIP/H.323, Zoom Rooms and Microsoft Teams, without the need of a PC, Mac or tablet. The eCLINiC supports sharing from a range of external devices, including built-in wireless content sharing which lets medical personnel share content from their personal devices without the need for cables.

## Features and Benefits

### Affordable Design

The eCLINiC was designed from the ground up to minimize your total cost of ownership and provide a high quality user experience while allowing for the seamless connection of examination devices. The optional cart is designed to integrate with the available accessories, allowing rapid deployment with minimum maintenance.

### Pan, Tilt and 5x Digital Zoom

The robust high-resolution 4K camera has a 5X digital zoom with automatic framing and motion detection that ensures high resolution imaging with support for far end camera control.<sup>1</sup>

### Touchscreen Medical Monitor

Our medical grade monitor incorporates an anti-microbial housing and rechargeable lithiumion batteries that will power the total system for 6 to 8 hours, depending upon connected accessories. The entire assembly is IP65 rated for disinfectant wipe-down.

### Flexible Collaboration Options

IT administration can configure the eCLINiC to use Poly Video Mode (SIP/H.323), or popular applications like Zoom Rooms, Microsoft Teams, and others that are native on the CLINiC.

### Superior Audio

An integrated beamforming microphone array provides excellent noise blocking and echo cancellation capability, allowing for use in noisy environments.

### Content Sharing

Users can share content wirelessly using the Poly Content App, Apple Airplay, or Miracast; or they can use the available HDMI port via cable.

### Flexible Mounting and Accessory Options

The flexible design allows you to place it on a cart, wall mount, or desktop stand. Integrated Wi-Fi and integrated batteries allow up to 8 hours of cart roaming without a recharge. Integrated stethoscope and Horus Scope options are available to allow for a wide variety of clinical evaluation applications.

<sup>1</sup>Depending on video cloud service and far-end camera control application in use.

# Telehealth Use Cases

Ideal for school-based health, behavioral health, patient bedside check-in, skilled nursing facilities, correctional health, and anywhere a PC, laptop or tablet is used today.

## Optional Accessories

### Stethoscope Kit

The stethoscope kit includes a JedMed digital Omnisteth along with headphones that allow the user to hear what the remote doctor is hearing. Additionally, our patent-pending technology allows the user to hear both the remote doctor and the heartbeat simultaneously.

### Horus Scope Kit

Horus scope video capture tools are integrated with the eCLINiC with a storage hook for rapid access and safe transport. Power is drawn from the eCLINiC batteries or AC power, ensuring the device is always ready for use. Auxiliary lenses may be stored in the protective foam insert fitting the tray of the optional Iron Bow cart.

### Custom Cart

The custom configured cart is optimized for the weight and functions of the eCLINiC and includes a stable five wheel base, accessory bin, steering handle and adjustable angle VESA mount to accommodate different viewing situations.

## IronCare Managed Telehealth Services - Warranty, Monitoring & Maintenance

IronCare™ Managed Telehealth services for your CLINiC, MedView, and MEDiC products are designed to ensure maximum service availability and user satisfaction while minimizing IT support efforts. Specific services include:

### Advance Replacement Warranty (ARW)

Extended warranty featuring 2nd day component replacement, initiated prior to return of the customer unit.

### IronCare Monitoring

Continuous monitoring of network and unit behavior to address potential issues before they affect the user experience.

### IronCare Maintenance

Ensures updates and patches are deployed to avoid security concerns and provide optimal user experience.

### IronCare Deployment

On-site installation/replacement services to relieve IT staff and rapidly and reliably deploy units.

### IronCare Cloud Video

A secure, high quality platform for rapidly enabling video consultations between Iron Bow endpoints, video conference rooms, patients, providers, and any other standards-based video endpoint or computer.
